effect on growth of A431 cells 137
1,10-phenanthroline 455
effect on DNA binding by 1,25-dihydroxyvitamin D receptor 455
o-phenanthroline 131
phenytoin 107
porcine thyroid 107
effect on Ca-mediated CT secretion 107
phosphoenolpyruvate carboxykinase 310
phosphoramidon 131
pituitary 287, 322
spinal cord injured patients 287
pituitary adenylate cyclase-activating polypeptide (PACAP) 110
induction of cAMP production in PC12 pheochromocytoma cells 110
plasma metabolites 482
platelet activating factor 6
platelets 352
membrane fluidity 352
in diabetes mellitus type 1 352
in diabetes mellitus type 2 352
polymorphonuclear leucocytes 352
membrane fluidity 352
in diabetes mellitus type 1 352
in diabetes mellitus type 2 352
porphyrin excretion 379
urinary 379
effect of hormonal oral contraceptives 379
postnatal development 163
of rat 163
expression of hepatic insulin gene receptor 163
power spectral analysis 43
heart rate variations 43
effect of methylcobalamin on diabetic autonomic neuropathy 43
prediabetes 547
immune intervention 547
predictive value 90
diabetes mellitus type I 90
insulin autoantibodies 90
proinsulin autoantibodies 90
insulin autoantibodies 90
proinsulin autoantibodies 90
prednisolone 469
pregnancy 231
reduced GLUT4 glucose transporter in adipose tissue 231
progesterone 159, 345
effect of low blood magnesium 159
progestins 345
proinsulin 90
autoantibodies 90
prolactin (PRL) 121
thyrotoxic rats 121
reduced level during immobilization stress 121
prophyrinuria 379
prostaglandins 6, 79
and cervical collagen concentration 79
effect on collagen concentration in rat uterine cervix 79
prostate 345
sex steroids 345
regulation of transforming growth factor 345
protease 131
protein kinase C 110, 272
activation in PC 12 pheochromocytoma cells 110
proteinuria 303
puberty 279
pulsatile release 189
of β-endorphin 189
of TSH 189
pyruvate dehydrogenase complex 104

Q

quadriplegia 283, 287
plasma insulin 283
serum insulin-like growth factor-1 287
serum lipoproteins 283
serum testosterone 287
serum uric acid 283

R

radioimmunoassay (RIA) 293
antibodies to glutamic acid decarboxylase 293
β-receptor blockade 67
KCl loaded dogs 67
insulin levels 67
renal vascular escape 6
alloxan-diabetic kidney 6
effect of insulin 6
normal kidney 6
effect of insulin 6
repaglinide 263
effect on insulin release 263
ionophoretic activity 263
resuscitation 126
pigs, formation of nonthyroid illness 126
retinopathy 303, 555
diabetic 303, 555
glycosaminoglycans 555
retrobulbar autoantigens 533
rifampicin 148
tuberculosis therapy 148
misdiagnosis of Cushings syndrome 148
rT3 126

S

S 3075 263
effect on insulin release 263
ionophoretic activity 263
Schlichtkrull "M"-value 1
analysis 1
drawbacks 41
senile dementia-Alzheimers type 204
serotonin (5-HT) 121
sex hormones/steroids 275, 345, 508
effect on immune system 275
regulation of transforming growth factor β 345
in breast cancer 345
sex hormone-binding globulin 508
women with anorexia nervosa 508
sexual activity 279
rats, effect of pubertal benzpyrene exposure 279
signal transduction 267
thyroid-stimulating antibody-dependent 267
thyrotropin-dependent 267
Simondsia chinensis 318
simmondsin 318
effect on thyroid hormone levels 318
simvastatin 239
long-term effects in hypercholesterolemic patients with NIDDM 239
SMS 201!995 179
sodium orthovanadate 272
somatostatin (SS) 179, 322
and acromegaly 322
effect on growth of A431 cells 179
spinal cord injury 283, 287
plasma insulin 283
serum insulin-like growth factor-1 287
serum lipoproteins 283
serum testosterone 287
serum uric acid 283
spontaneously hypertensive rats 415
stable isotope investigation 425
hepatic glucose production 425
Cushings disease 425

staurosporine
effect on PACAP-induced cAMP accumulation in PC 12 cells 110
steptozotocin diabetes in rat 58
subcutaneous glucose monitoring 58
steroids 436
drug delivery systems 436
depot testosterone 436
osmotic mini pumps 436
silastic tubes 436
streptozotocin diabetes 70, 216, 306, 515
baboons 70
model for IDDM 70
effect of Etomoxir® 515
effect of γ-hydroxybutyrate 216
effect of nicotinamide 216
rats 104
reduced induction of carbohydrate utilization 104
by inhibition of fatty acid oxidation 104
stress 121, 332
effect on hypothalamic-pituitary-adrenal axis 332
immobilization of thyrotoxic rats 121
effect on prolactin release 121
succinic acid esters 251, 263
effect on insulin secretion 251
6-O-D-galactosyl methyl 251
isopropyl 6-O-(3-O-methyl)-D-glucosyl 251

T

T-cell proliferative responses 275
teleosts 389
adrenal complex 389
testes 539
autoimmune diseases 539
testosterone 275, 287, 339, 345
administration 275
effect immune system 275
dihydro- 339
spinal cord injured patients 287
women with anorexia nervosa 508
thiazolidinedione 169
effect on muscle insulin resistance 169
genetic obesity 169
thiocyanate 450
thromboxane A2 (TXA2) 235
thymosin F5 465
thymus gland 465
thyroid 121, 450
dysfunction 121
porcine 107
isolated perfused 107
calcium mediated calcitonin secretion 107
thyroid hormone 121, 126, 314, 318, 503
effect on α-glycerophosphate dehydrogenase 314
effect on hepatic malic enzyme 314
effect of long-term simmondsin 318
metabolism 126
women with anorexia nervosa 508
thyroid status
and plasma methionine-enkephalin 384
thyroid stimulating antibody 267
signal transduction 267
thyroiditis 45
subacute 45
and interferon- 2a therapy 45
thyronine, 3,5,3--triiodo- (T3 or T3) 173, 221, 314, 318
effect on -glycerophosphate dehydrogenase 314
effect on hepatic malic enzyme 314
effect of long-term simmondsin 318
γ-glutamyltranspeptidase expression in rat hepatocytes 221
thyrotoxicosis 49
autoimmune 49
long-term intraperitoneal insulin administration 49
thyrotroph 201
of hypothyroid mouse 201
thyrotropin (TSH) 173, 267, 318
effect on thyroid hormone levels 318
pulsatile secretion 173
rat pituitary 173
effect in chronically cannulated rat 173
recombinant human 173
effect in chronically cannulated rat 173
signal transduction 267
thyrotropin receptor 267, 528
thyrotropin releasing hormone (TRH) 367
effect on enzyme secretion of rat pancreatic acinar cells 367
thyroxine (T4 or T4) 173, 318, 450, 503
effect of long-term simmondsin 318
women with anorexia nervosa 508
Tibgolone 387
tibolone 387
effect on insulin-like growth factor-1 387
postmenstrual women 387
tissue culture 209
fibroblast free 209
of islet cells 209
neonatal rat islet cells 209
tolerance 539
gonadal autoimmunity 539
training 473
calcitonin gene-related peptide 473
transforming growth factor β 345
activation 345
binding proteins 345
receptors 345
regulation by sex steroids 345
breast cancer 345
prostate 345
transsphenoidal microsurgery 425
Cushings disease 425
triglycerides 239, 283, 508
spinal cord injury 283
women with anorexia nervosa 508
troglitazone 439
effect on fructose-induced insulin resistance 439
tuberculosis 148
rifampicin therapy 148
misdiagnosis of Cushings syndrome 148
tumor necrosis factor α (TNFα) 255
IDDM 255
tyrosine kinase 272
regulation of Ca2+ influx induced by extracellular ATP in PC12 cells 272
tyrphostin 272

U

Ulm sugar watch system 58, 59
urate 155
uric acid 283
uric(a)emia 155
effect of fructose infusion 155
urolithiasis 155
uterine fluid 35
human 35
amylase activity and infertility 35
UV-B radiation 113
effect on human islet immunogenicity 113
effect on islet function 113

V

vagal impulses 67
efferent 67
vascular endothelium 16
relation with parathyroid function 16
vasopressin 126
ventricullar fibrillation 126
pigs, formation of nonthyroid illness 126
vertebrates 389
function of adrenal complex 389
regulation of adrenal complex 389
principal corticosteroids 389
vitamin C 419
vitamin D
1,25-dihydroxy- 403
see also dihydroxyvitamin D
metabolism 455, 461
metabolites 83
renal degradation 83

W

Walker carcinoma 403
effect of dexamethasone 403
effect of 1,25-dihydroxyvitamin D 403
weight reduction 499
changes in glucose tolerance 499
changes in insulin sensitivity 499

X

X-radiation 59
long-term stability of on-line subcutaneous glucose monitoring 59
